

ENGINEERING SERVICES

NKE Electronics and Communications is a premier Engineering Services outsourcing partner for customers across the globe.

We offer cost effective, high quality and product-centric services to customers in Space, Aerospace and Defence.

We are ISO 9001:2008 certified, process driven organisation providing comprehensive Engineering Design Services. We offer the expertise of our Mechanical and Electrical design engineers to meet our customer's specific requirements.

We utilize a variety of creative methods to establish the stages required to mature our customers' designs into a product. Our engineers have significant expertise in part modeling, surface modeling, detailing, creating templates, optimisation & analysis, assembly to meet fit-and-function criteria's and design for manufacture.

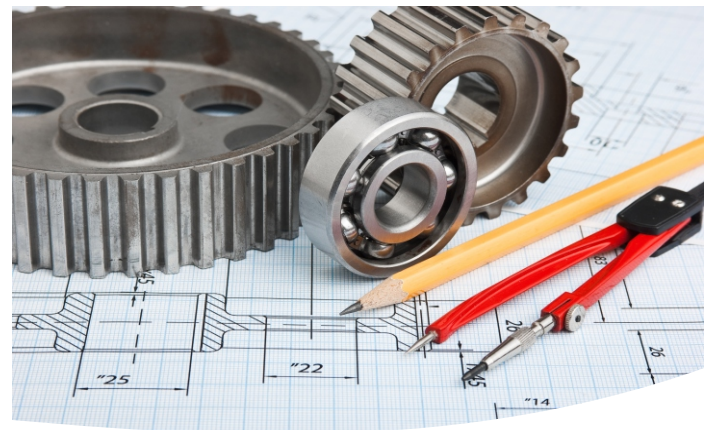

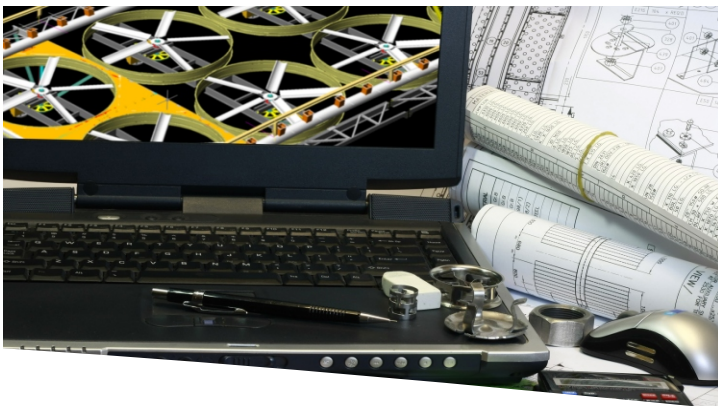

We can also assist our customers in CAD Data translations between various CAD formats, versions, platforms and legacy data migration.

from the COO's desk...

"It is only in the recent past that India is being acknowledged as a hub for outsourcing high-end Engineering Services.

We, at NKEC, are committed to leveraging this paradigm shift to work up the value chain. We see ourselves, not just as outsourcing partners, but as value partners working together towards a common cause - creating value for our customers, our customers' customers and in turn, for ourselves."

Our Service Portfolio:

- Product Development
- Mechanical Design
- CAD Services
- CAD Visualization and Concept Design
- Design Optimization
- Plastic Components
- Sheetmetal Components
- Value Engineering

Why Us:

- Process Driven Organization.
- Quality service
- Flexible engagement model
- Follow-the sun approach
- Industrial & Engineering design experience
- Manufacturing know-how

Tools:

- ProEngineer /CREO
- Autodesk Inventor
- Solidworks
- Unigraphics
- CATIA
